

Form: 10

Date: 6th Dec 2011

Names: Benedikt F. & Simon H.

## A Project about *People and Technology*

### The Mercedes-Benz World Abu Dhabi

The Mercedes-Benz World is a racing track on an island which was built by (human) members of the Mercedes-Benz company. The island is a highlight for all racing sport fans.

On the island, there are many jobs. For example, you can work in the hotel, work on the the racing track, or work on the boat that brings the racing sport fans to the island.

On the racing track, you find a pitwalk, a pitlane, bleachers (stands), and a big garage for the cars. You can only reach the island by boat. One round of the track is 2,56 km long. The track is used for different races such as the 24-Hour Race.

The island has a nice beach with palms and a five star hotel. It's great for everybody.
