

Mayflower Project

On 25th May 2020, four police officers killed a 46-year-old African American. George Floyd died in Minneapolis, Minnesota. After the violent death of George Floyd, many riots started. People protested against the unfair conditions in America.

A long time ago, in 1620, the first pilgrims came to the USA. They came by ship (called Mayflower) from England to North America. All voyagers fled from racism and suppression in England. They wanted to create their own "New World".

All those efforts have been destroyed because all the things the pilgrims fled from are now back. It's the same situation, just 400 years later. These are the reasons why my Mayflower is heading against a wall. The prospect of a better life in America is messed up.
